[54] Title of the Invention: Ulcer Healing Syrup

[57] Abstract

The ulcer healing syrup is a Chinese drug intended for treating gastric ulcer and duodenal ulcer. The formula of this medicine consists of the Chinese herbs Sanguis draconis, alum, carbon carbonate and honey. This medicine stimulates blood circulation and relieves pain, and is highly effective in healing ulcers. Patients of gastric ulcer or duodenal ulcer can be healed and thoroughly cured by taking 3 to 5 doses of this medicine in a week. They do not need to experience the pain associated with surgical treatments. The manufacturing costs for this medicine are relatively low; and it is easy and convenient to use for ulcers treatment. This new medicine benefits a lot of patients because of its cost effectiveness, convenience and effectiveness in thoroughly curing the disease without surgery.

Claims

1. The ulcer healing syrup comprises the Chinese medicinal ingredients of Sangusis draconis, alum, carbon carbonate and honey.
2. The ingredients of the ulcer healing syrup of Claim 1 comprises the following quantities: Sangusis draconis 6-20 g, alum 40-80 g, carbon carbonate 30-70 g, honey 400-900 g.

Explanation

Ulcer Healing Syrup

This invention is a Chinese drug intended for treating gastric ulcer and duodenal ulcer.

Gastric ulcer and duodenal ulcer are common and frequently occurring diseases. There are many factors that cause these two diseases, and there are also a lot of therapies and drugs for treating them. One of the major forms of therapy is surgery. It has been reported that the School of Medicine in the Hong Kong Chinese University has in the past few years invented an antibiotics against pyloric spirillum. Patients with gastric ulcer and duodenal ulcer only need to take this antibiotic for a week for the symptoms to disappear. Medical studies have shown that 90% of patients with duodenal ulcer and 70% of the patients with gastric ulcer are infected by pyloric spirillum that resides in the human stomach. These studies also show that in Western medicine, significant achievement have been made in curing gastric ulcer and duodenal ulcer without using surgery. However, in the traditional Chinese medical approach, there is currently no Chinese drug for curing these two diseases in the market. The purpose of this invention is to make a new Chinese drug for treating gastric ulcer and duodenal ulcer, based on a secret prescription of traditional Chinese medicine handed down in a family from generation to generation.

The technical formula of this medicine: use Sangusis draconis, alum, carbon carbonate and honey as ingredients; gather Sangusis draconis, alum, carbon carbonate in the prescribed quantities and grind them into powder; add the appropriate amount of honey into it; heat and stir all the ingredients into syrup.

This medicine can stimulate blood circulation and relieve pain, and is highly effective in healing ulcers. Patients with gastric ulcer or duodenal ulcer can be thoroughly cured by taking 3 to 5 doses of this medicine in a week, so they do not need to experience the pain associated with surgery. Take the example of a patient with the surname of Lu, who was diagnosed by his local county hospital to be suffering from duodenal ulcer. He was in great pain and could not get out of bed. He was hospitalized for treatment for 10 days or so, which had no obvious beneficial effects but cost him 3000 yuan. The hospital decided to conduct surgery but the patient could not afford it. He therefore had to leave the hospital. After that, he took 5 doses of this new invention of ulcer healing syrup and was cured in one week. One month later, he was totally recovered and could do physical work again. The ulcer has not recurred. In another example, patient Li was diagnosed as having gastric ulcer by a hospital and was cured by taking only 3 doses (in one week) of the ulcer healing syrup. The gastric ulcer has not recurred to him in the past eight years.

This medicine is also very effective to cure gastric diseases.

The manufacturing costs for this medicine are relatively low. It is easy and convenient to use for ulcers treatment. This new medicine benefits a lot of patients because of its cost effectiveness, convenience and its effectiveness in thoroughly curing the disease without surgery.

The ulcer healing syrup from this invention has some minor side effects, such as diarrhea in the first 1 to 2 days after usage. A small number of patients may experience nausea and vomiting. It is not suggested for use by patients with diabetes.

Based on clinical applications over many years, the formula of this medicine is as follows: Sangusis draconis 6-20 g, alum 40-80 g, carbon carbonate 30-70 g and honey 400-900 g. Grind the Sangusis draconis, alum and carbon carbonate into powder, then add honey and mix well. Heat and stir the mixture in an iron pot until it turns into syrup.

[54]发明名称 愈疡浆

[57]摘要

愈疡浆,系一种治疗胃溃疡、十二指肠溃疡的中成药,由中药血竭、明矾、苏打、蜂蜜组成。该药活血止痛、促进溃疡愈合的功能极强,胃溃疡及十二指肠溃疡病人服用一个星期,用药3—5剂,溃疡得以痊愈,达到根治的效果,免除了患者手术治疗的痛苦。该药成本不高,易于服用,治疗方便,为广大患者提供了一种经济治疗、就地治疗、不动手术、彻底根治的新药。

(BJ)第 1456 号

权 利 要 求 书

- 1、愈疡浆，其特征在于由中药血竭、明矾、苏打、蜂蜜组成。
- 2、依照权利要求1所叙述的愈疡浆，其特征在于各组成的份量构成为：
血竭6—20克，明矾40—80克，苏打30—70克，蜂蜜400—900克。

说明书

愈 疡 浆

本发明为一种治疗胃溃疡、十二指肠溃疡的中成药。

胃溃疡、十二指肠溃疡为一种常见病、多发病。发病的原因较多，治疗的方法及药物也较多，手术治疗是主要方法之一。据报导，近年来香港中文大学医学院发明了一种针对幽门螺旋菌的抗生素，胃溃疡及十二指肠溃疡患者只须服用此种抗生素一个星期，病患便得以解脱，因为医学的研究证明，九成的十二指肠溃疡患者，七成的胃溃疡病人，都是受到寄居于人类胃部的幽门螺旋菌感染。可见，不用手术治疗，采取服用西药的方法治愈胃溃疡、十二指肠溃疡已经取得了显著成果。然而，采用中药疗法，仅服用中成药治愈胃溃疡及十二指肠溃疡，目前还未见此类中成药面市。此发明之目的，在于继承中医祖传秘方的基础上，推出一种治愈胃溃疡及十二指肠溃疡新的中成药。

该药的技术方案是：以中药血竭、明矾、苏打、蜂蜜为组分，将血竭、明矾、苏打按一定比例配方后研细，再加适量蜂蜜搅拌炒制即成。

该药活血止痛，促进溃疡愈合的功能极强。胃溃疡及十二指肠溃疡病人服用一个星期，用药3—5剂，溃疡得以痊愈，便可根治，免除了患者手术治疗的痛苦。如患者吕某，在县人民医院确诊为十二指肠溃疡，卧床不起，疼痛难忍，住院十多天，花钱3000元，效果不佳，医院决定手术治疗，但因患者经济困难，交不起手术费，只得出院。过后，患者服用本发明推出的愈疡浆五剂一个星期，病愈，一个月后身体恢复健康，并能参加劳动，再未复发。患者李某，医院确诊为胃溃疡，服用愈疡浆三剂（一个星期），病愈，已过八年再未复发。

该药对慢性胃病也有显著疗效。

该药成本不高，易于服用，治疗方便，为广大患者提供了一种经济治疗、就地治疗、不动手术、彻底根治的新药。

该发明推出的愈疡浆，服用后有轻微副作用，如头1—2天内腹泻，有少数患者恶心作呕，对糖尿病患者不宜服用。

依据多年临床应用，该药的配方为：血竭6—20克，明矾40—80克，苏打30—70克，蜜蜂400—900克，将配方中的血竭、明矾、苏打研细，加蜂蜜拌匀，在铁锅中炒制即得。
